

## Team Building

WHAT

**Input:** icebreaker template and different skills categorized by colored dots

**Output:** interdisciplinary teams of 2-3 students

WHY

Understand / Meta-cognitive

WHO

whole group(graduate level)

WHERE

Online

TIME

10 min

HOW

Participants get acquainted by forming small teams of 2-3 students with different interdisciplinary backgrounds. An introductory activity involves a quick construction of an avatar using a miro icebreaker template to create an online representative. The participants are asked to stick colored dots on their avatar to assess and indicate their background knowledge (e.g. design disciplines, programming skills)
