

Data Abstraction

WHAT

Input: worksheets in the miro board that document the identified data structures, types, and web source.

Output: an analyzed data with data structures and attributes types

WHY

Apply / Conceptual

WHO

team (2-3 members)

WHERE

Online & Offline

TIME

homework

HOW

Each team searches for interesting data sets they would like to visualize during the semester project and websites with freely usable data sets are provided by the advisor. The team should analyze their data sets and by assigning attribute types (e.g., nominal, ordinal) and by identifying data structures such as temporal or spatial structures.
