Search visualization example

WHAT

Input: blogs and websites with visualization examples as inspiration

Output: two different visualizations per team member

WHY

Evaluate / Meta-cognitive

WHO

Individual(graduate level)

WHERE

Online

TIME

homework

HOW

Based on the identified data structures and tasks, students are asked to search for visualization examples that serve as personal inspiration for their project. The activity is performed by each team member individually as homework and the advisor provides different visualization online collections and websites.
